

Department: Human Resources & Recruitment

Job Description: Senior Developer

Location: Byron Bay/Remote

Date: September 2020

Summary

Get innovating! We're seeking a passionate and talented senior developer with a wide range of experience to help drive our Open Banking app to the future.

Details

Split Payments are searching for a Senior Developer with extensive experience building web applications that combine solid architecture, security and scalability with a focus on customer experience. You will be a vital team player whom is able to balance the core platform requirements of the business with the ability to embrace new technology and best-practice innovations in the sector.

Creating web services with a keen focus on API consumability is second nature. You are comfortable working on large projects, taking them forward and making recommendations to the direction they take based on evidence provided by hard data. You are familiar with multiple payment gateways and associated PCI compliance requirements.

Split at a glance

- A single app, with a large pipeline of new integrating clients.
- Stack snapshot: Rails, RSpec, PostgreSQL, Redis, Puma, Yarn, Webpack, AWS.
- Process management: Asana, GitHub.
- TDD with 100% coverage (according to Simplecov).
- We ❤️ code reviews.

Key Responsibilities

- Design, develop and iterate through new features.
- Provide insight and advice to other key stakeholders.
- Review and mentor other team members. Be a team player!
- Ensure production-ready high code quality.
- Continually consider the product from both a holistic and specific view-point.

SPLIT 

jobs@splitpayments.com.au | splitpayments.com.au

To Apply

To apply for this role please email your CV to jobs@splitpayments.com.au. It is vital that you include a cover letter explaining why you are suited to this role.

About Split Payments

Australia's First Open Banking Payments Platform, Split Payments seamlessly connects businesses and consumers directly with the Australian banking system – creating an entirely new approach to direct entry banking. We've created an Open Banking API that makes bank transfers faster, more visible and easier to manage than card payments – but with significantly lower transaction costs. When you combine this with sophisticated features including Direct Debit Consent Management and Instant Account Verification, the possibilities are endless.

Our mission is to reimagine global banking infrastructures through deep tech innovation and create a new era of digital banking.
